**Comments:** We called John Hebditch to refinish a new hardwood floor that another company (Footprints Floors, Lone Tree) installed and applied the wrong finish which still smelled after 16 days. John is Bona certified and recommended by the local Bona representative. He installs and finishes hardwood floors. Although he was booked 2 months out, John squeezed us into his schedule when he learned of our predicament. His work was excellent. He and an assistant buffed, and applied a coat of Bona Traffic finish in our guest room. It looks great and he even left us a Bona mop and cleaning material. We highly recommend him. Please give him a call if you have hardwood floor needs.

**Comments:** This company did a horrible job on our floors. Their employees walked off the job on the first day. Layout was horrible and had to be changed. We specified Bona water-based finish to their estimator, but they brought another cheaper brand. We again specified using Bona and was assured they would use Bona by the Project Manager. Their employee was deceitful by bringing in a old Bona container to convince us it was a Bona product. After the finish was applied, we had an acrid odor for more than two weeks; we had the sample analyzed and it was not Bona. We had hire a company to have the floor screened and coated with the Bona product. They also beat up our baseboards and reinstalled them very poorly. We had to replace some and have all the baseboards reinstalled and we had to repair most of them. They punctured our walls when removing the baseboards and left marks from their sander. The Project Manager did apologize and reimbursed us for the cost to rescreen and refinish the floor, and for some of the cost for replacing the baseboards. However, this was a nightmare for us and delayed our remodel of our guest bedroom. A very bad experience.

**Service Provided:** Removal and Installation of Ceramic long tiles

**Date Service Performed:** October 2018

**Contractor Name/Company:** Extensive Creativity Marble & Tile, Inc

**Contractor Phone Number:** 7205777084

**Does the resident recommend the contractor?** Yes

**Comments:** Armando Soto installed 550 sq feet tile for me on the kitchen, hallway and family room floor. He installed on two different surfaces, one cement and one on kitchen floor with cement board. He had to level almost the entire family room floor because it was so uneven and take up all the previous tile. He knows what he is doing, and aims to please. He is honest, I never worried about him being in the house alone. He's fast and very reliable. I would highly recommend him for any tiling job. He is also moderately priced and does not bring along a crew of strangers to help.

**Comments:** I called Drew Deutmeyer, on behalf of my mother, to do a few jobs around her Ken-Caryl house. He came over within a day to see the jobs, then sent us a detailed estimate and scheduled a day to do the work. Throughout the process, Drew communicated and worked in a highly professional manner from the very first contact until the jobs were completed. The jobs were varied: carpeting, painting, plumbing and electrical, and all jobs were done excellently. My mother was 100% satisfied. On a personal note, my mother is hard of hearing and Drew made a sincere effort when speaking to her to speak in a loud, clear voice so she could be part of our conversations. We will not hesitate to call Drew again in the future.

time. Always provided updates on the progress and excelled at making suggestions for both design and materials-to-be-used. Jeannie has a wonderful personality, is very communicative, and she was always quick and patient to answer any questions we had. **Comments:** Jeannie Frankovitch and her team were fantastic! They installed the backsplash tile in our kitchen and we couldn't be happier. We had purchased glass subway tile, which we know is a little more challenging to work with and we are very pleased with the results. They were helpful in guiding us through some placement/design decisions and they kept the project area clean, which may not seem important unless you've worked with a contractor who doesn't clean up each day. I will absolutely use Sister-Fix-It again. I already have a list of future projects!
