Does the resident recommend the contractor? Yes

Comments: We have had a vented skylight in our bedroom for several years. In the last couple of heavy rains, we have had a small leak. I called John Thomas at Hope Roofing to see if he would look at it for us. I fully expected him to come and tell us that we needed to replace the skylight. Instead, he looked at it and found the problem and fixed it saving us quite a lot of money over the cost of replacing it. I can't tell you how happy we are to have found a businessman who chose the best solution for us as opposed to the most profitable for himself. I cannot recommend Hope Roofing too highly.

Date Service Performed: August 2014

Contractor Name/Company: Mountain Roofing

Contractor Phone Number: 3039956433

Does the resident recommend the contractor? Yes

Comments: Bruce was very good at following up with us and our insurance company. He knew exactly what our insurance company would and would not pay for and worked to get the most out of our benefit. There were no surprises during the whole process. The crew showed up when they were expected, were fast, efficient and did a great job. They cleaned up afterwards, running a magnet around the entire house to pick up stray nails. Months after the job was done Bruce noticed some staining on a few of the tiles (manufacturer issue) that we hadn't noticed, and is following up on that as well. Definitely recommend Mountain Roofing.

Contractor Name/Company: Mountain Roofing

Contractor Phone Number: 3039956433

Does the resident recommend the contractor? Yes

Comments: I used Mountain Roofing to have some repairs done on our concrete tile roof during the sale of our house. The owner, Bruce, was easily reached by phone and recognized the importance of getting the repairs done in a timely fashion to satisfy the inspection objections from the seller. Even though the job was small compared to his other jobs he got a crew over there that same week to effect the repairs. He identified the repair method called out by the buyer's roof inspector to be inferior and explained the proper method and materials to use. (This part of the repair was to install metal flashing around the perimeter of a 15 x 15' EPDM surface at the flat apex of the roof -- some thing the original installer should done ten years prior.) Furthermore, the quote to fix it was fair. He's a Ken Caryl resident and will be my first call for any roof work in the future.

He started both jobs ahead of promise date and completed them quickly. Touch-ups afterwards were handled right away. I felt I could always reach him and he would handle my questions immediately. They were also a great resource in helping us determine which type of roofing material would be best for our application. Eventually, we decided on a stone coated steel roof and are most pleased with the result. Omiah Travis was our major contact and did a fabulous job.
